

## BI-AURA ENERGY THERAPY

### WHO WILL BENEFIT

Described by medical physician and Vice President of the CMA, Dr. Mark Atkinson as *"The most powerful, exciting and clinically effective energy therapy I have witnessed"* Bi-Aura therapy is safe and effective for all, from the very young to the elderly and animals.

### SEEING IS DIS-BELIEVING

*When I first witnessed this therapy I was incredulous! The therapist moved in flowing, graceful, motion around the patient who, although standing, was in a completely relaxed state. No physical contact was made with the patient yet it appeared as if he held invisible rods with which he was able to propel her gently around the room.*

The energy field is a fusion of two forms of energy: universal energy from space and earth energy from the planet. Vortices of energy, known as chakras, are located at specific places in the body. These chakras act as energy receivers, generators, transformers and distributors. Universal energy enters at the crown chakra and earth energy enters at the base chakra; these energies flow up and down the centre of the body meeting at other major chakras. Individual chakras transform the energies to vibrate at the appropriate frequency required to feed the organs of the body dependent on that chakra

### HOW BI-AURA THERAPY WORKS

All illness and chronic pain is encoded in the energy matrix in the form of energy blockages or disturbances. These may have arisen suddenly as a result of physical, mental or emotional trauma or over a period of time through established mental patterns of stress, anxiety or fear. These blockages become locked in the auric field and obstruct the healing flow of energy. When they are dispersed and the energy flow restored, healing is carried throughout the body down to cellular level. The natural instinct of the body is to heal and, as the healing energy is always present, if we can remove whatever is preventing us from receiving this energy then our health will definitely improve.

### THE BI-AURA PRACTITIONER

Bi-Aura practitioners are trained to locate imbalances in the energy system and their knowledge of the energy matrix enables them to assess whether an energy blockage has a physical or emotional root and whether it is a past or present issue.

Using a series of hand movements Bi-Aura practitioners raise the vibration of the blocked energy enabling it to be drawn out of the chakras and cleared from the aura. Similarly they are able to attract energy to deficient areas.

### WHAT TO EXPECT

Clients are asked to commit to a minimum of four sessions as, although it is usual for people to be aware of subtle changes after only one session, deep seated energy blocks may take several sessions to break down. The therapy requires no oils or special equipment yet the results can be astonishing from the welcome sense of peace and well being to the profound relief of chronic pain. Clients remain fully clothed during sessions and although there is little to no physical contact many experience a variety of sensations such as tingling, heat, cold, a feeling of lightness and a deep sense of relaxation.

There are three main types of response to Bi-Aura therapy

- An immediate improvement in health, often with significant cessation of pain
- No obvious change but a later realisation that the ailment has gradually faded away
- An apparent, slight deterioration (often referred to as a healing crisis) as the body adjusts to the changed energy flow

### CASE HISTORIES:

*" After my second session I experienced symptoms similar to those felt during the bout of influenza that preceded my condition. Following the third session I was pleasantly surprised to find myself once more able to undertake tasks in a manner I had once thought of as perfectly natural. It was a source of personal happiness to find myself becoming pleasantly tired instead of feeling bad tempered and totally drained of energy"* Kerry Long, chronic fatigue

*" I was amazed to discover after one session of Bi-Aura therapy the pain I had experienced in my arms for over three years had vanished and was even more delighted when it did not return."* Malcolm Maine, shoulder injury

12 yr old Michael Goods who over a two year period had been referred from specialist to specialist in an attempt to find a cure for the ugly rash which covered his stomach and

arms. *'It was so upsetting, Michael was so self conscious about it, he became depressed and withdrawn. He was being teased and bullied at school and his schoolwork was suffering. There was nothing the Doctors could do. Yet after one session of Bi-Aura therapy the rash vanished! He is totally different boy now. Outgoing, confident and his teachers are astonished at his progress'*. Says single mother Janice Goods.

Owner Gee Fiori has this to say: *'When our hyperactive miniature dachshund 'Lucy' gradually lost the use of her back legs and tail we explored every veterinary avenue until an operation with a poor chance of success was the only option. So we then tried chiropractic treatment to no avail. On recommendation we turned to Bi-Aura. Five minutes into the session her tail began to curl two sessions later we had to prevent her hurtling up and down the stairs'*

Other delightful outcomes include 'Tweet' an aged ailing budgerigar who is singing and active again; 'Moggins' a fierce tom cat no longer attacking his owner; show horse 'Munchkins' happy to have his annual hair clip without severe restraint; spaniel x whippet 'Vandal' enjoying walks again after years on pain killers; 'Wolfie' a horse suffering from fibrosis of the shoulders, deemed unsafe to ride and doomed for slaughter, safely back in full work; sheep with renewed appetite for life and cast cows back on their feet as well as many farmers " as you're here you couldn't just fix my back could you?"

We are delighted to provide presentations, demonstrations and sample sessions to interested associations. Workshops and Diploma training courses are available nationwide. For details and practitioner directory please contact:
